

## Questions and Answers #2

1. On page 3 of your bid pkg, the statement is that the assembly must include ... “the bushing and boron carbide insert”. The drawing refers only to a nozzle and a barrel. Is the reference to a “bushing” and an “insert” being used interchangeably with “nozzle” and “barrel”, or are there additional parts required for this assembly, other than that which is shown on the print?

The terms nozzle (insert) and barrel (bushing) are the same.

2. Can you just give us the part number you want pricing for?

The information available has been provided.
